

# AFTER-SCHOOL PROGRAMS

## RADICAL ROBOTICS

Join Mad Science for a hands-on After School program all about Robots! Children will discover how robotic devices use sensors to learn about their environment and how people use robots to get work done. They will explore the mechanical aspects of robots, circuitry, and programming. Have fun building and navigating robots through obstacle courses and even build their very own robot to take home with them! Mad Science has spent years developing robotics programs for elementary students; we can confidently say that we have robotics down to a science!

**Location:** North Yarmouth Academy

**Time:** 3:15 -4:15 pm

**Day:** Tuesday

**Dates:** 4/9/19 to 5/28/19 \* No class on 4/16/19

**Grades:** K-5

**Price:** \$120.00

**Register online today!**
